## President and CEO Panu Routila:

“The first quarter was a good start to the year in several ways. To begin with, the integration of MHPS progresses well and according to our plan, which gives us additional confidence that we will reach our planned EBIT-level run rate synergies of EUR 140 million at the end of 2019. As of end-Q1, approximately EUR 63 million of the targeted run rate savings has been implemented. Our progress is clearly visible in our Group adjusted EBITA-margin, which improved 1.0 percentage point to 5.5 percent year-on-year.

USD has depreciated close to 15 percent against the euro compared to the year-ago period, and as a result, foreign exchange fluctuations had an adverse impact on our reported volumes in the period. With that as context, our underlying financial performance turned out in line with our expectations.

On a comparable currency basis, Business Area Service recorded solid growth in order intake, largely due to an increase in modernizations. Also, our service agreement base value grew 2.3 percent from the end of 2017, demonstrating progress with the execution of our service growth strategy. External orders fell on a comparable currency basis in both Business Area Industrial Equipment and Business Area Port Solutions. In Port Solutions order intake decreased largely due to the timing of projects in the quarter. In Industrial Equipment, component orders grew sequentially, continuing the positive trend from Q4. This is an encouraging signal also for industrial cranes when looking ahead further into the year.

Although the weakened US dollar pushed the reported Group sales 1.7 percent below the previous year, on a comparable currency basis, Group sales increased 3.9 percent. Comparable sales grew in all business areas and regions. The sales growth was mainly attributable to Business Area Port Solutions, which benefitted from a strong order backlog.

We were able to expand our adjusted EBITA margin, mainly due to the actions we have taken to lower fixed costs in all business areas, improve productivity in Service, and restructure manufacturing operations and consolidate country level support organizations in Industrial Equipment. In Port Solutions, the improvement was mainly driven by sales growth. Material and salary inflation were absorbed by customer price increases, and the gross margin improved in Service and Industrial Equipment.

The global economy still looks strong, especially in the US, where key macroeconomic indicators continued to improve. That said, Europe has started to show signs of slowing growth, as capacity constraints have begun to hinder general economic activity.

Our demand outlook reflects the improved conditions in the North American manufacturing industry and stabilizing prospects related to container handling overall, and we are confident about the quarters ahead. Therefore, we have today reiterated our guidance for the full year: the sales to be approximately on the same level or higher than in 2017 and the adjusted EBITA margin to improve in 2018.

Based on the current FX rates, we continue to expect a negative impact of approximately 3 percent on sales from foreign exchange fluctuations. Our expectation for incremental P&L level synergy savings in full year 2018 remains at EUR 40–50 million. Furthermore, we continue to expect EUR 12 million net interest savings related to the debt refinancing activities we did last year.

Finally, I am very pleased with the progress we have made recently on R&D. Our pipeline includes several projects that will significantly advance our technological leadership. Speeding up some of these projects, in addition to investments in selected key IT initiatives, is the reason we are investing EUR 15 million more in these areas in 2018, as we guided for last quarter.

With artificial intelligence, for instance, we are developing new applications that use AI to predict the renewal of service agreements. Another example of our recent R&D achievements is Work Zone, a suite of location-based services for Lift Trucks, that uses GPS-based geofencing to create virtual fences around real-world areas for improved safety.

Regarding the additional spend on IT, the projects include a new product lifecycle management tool, a new HR system, an updated eCommerce platform, as well as investments needed to meet the requirements of the European Union’s new general data protection regulation. We are making these investments to improve efficiency and to secure our competitiveness and long-term success. We have some truly exciting R&D projects in the pipeline, and I look forward to informing you more about those over the coming 12 months.”

## Interim report January–March 2018

Konecranes applied the full retrospective approach in IFRS 15 transition, and the numbers for the periods in 2017 have been restated. Please refer to note 4 for more details on the implementation of IFRS 15 and other significant accounting policies.

Note: Unless otherwise stated, the figures in brackets in the sections below refer to the same period in the previous year.

### MARKET REVIEW

Activity in the world's manufacturing sector, according to the aggregated JPMorgan Global Manufacturing Purchasing Managers' Index (PMI), continued to expand in January–March 2018. While the average rate of expansion in the first quarter remained unchanged from the prior quarter, the growth in the global manufacturing sector begun to ease towards the end of the period, as companies reported slower growth of output, new orders and employment.

In the Eurozone, after a long period of rapid growth in the economic activity, short-term capacity constraints begun to limit the rate of expansion in the first quarter 2018. The growth, measured by the PMI, slowed across the region. The Netherlands, Germany and Austria were the bright spots, while the weakest growth was signaled in France. Outside the Eurozone, the UK manufacturing sector continued to expand, although slower growth suggests that the underlying strength of the upturn in the UK began to soften. The European Union manufacturing capacity utilization rate continued to improve slightly.

In the US, the PMI indicated strong growth and overall improvement in operating conditions across the manufacturing sector in first quarter 2018, the PMI advancing to a three-year high at the end of the period. Output and new orders received by manufacturers continued to expand sharply. Correspondingly, the US total industrial capacity utilization rate showed an uptick in the first quarter, after having improved only marginally in 2017.

PMIs rose also in the BRIC countries, but the rate of expansion remained more modest than in Europe or the US. Whereas manufacturing conditions in China and Russia improved only marginally, and the pace of improvement in India slowed clearly, activity in the Brazilian manufacturing sector recorded strong improvement in January–March, with factory orders and production showing sharp expansions.

Following a strong recovery in the world's containerized trade in 2017, the global container throughput continued

to expand at a robust pace, increasing by approximately 8 percent year-on-year in January–March 2018, and reaching a new all-time record.

Raw material prices, including steel and copper, were clearly above the previous year's level at March-end 2018. The average EUR/USD exchange rate was close to 15 percent higher compared to the year-ago period.

### ORDERS RECEIVED

Orders received in January–March totaled EUR 683.1 million (734.5), representing a decrease of 7.0 percent. On a comparable currency basis, orders decreased 2.6 percent. Orders received fell 3.2 percent in Service due to an adverse impact from foreign exchange fluctuations. With comparable currencies, order intake in Service increased 4.5 percent. In Industrial Equipment orders increased 0.3 percent. Harmonization of reporting practices following the MHPS acquisition had a EUR 13.8 million positive impact on internal orders in Industrial Equipment in the first quarter. In Port Solutions orders fell by 8.5 percent. Orders received decreased in the Americas and the EMEA, but increased in the APAC.

### ORDER BOOK

The value of the order book at the end of March totaled EUR 1,575.8 million (1,604.5), which was 1.8 percent lower than the previous year. On a comparable currency basis, the order book increased 2.7 percent. Order book increased 3.0 percent in Port Solutions, but decreased by 2.6 percent in Service and 8.3 percent in Industrial Equipment. The order book decline in Service was primarily due to an adverse impact from foreign exchange fluctuations.

### SALES

Group sales in January–March totaled EUR 672.8 million (684.1), representing a decrease of 1.7 percent. On a comparable currency basis, sales increased 3.9 percent. Sales decreased 6.7 percent in Service and 0.4 percent in Industrial Equipment. Harmonization of reporting practices following the MHPS acquisition had a EUR 10.9 million positive impact on internal sales in Industrial Equipment in the first quarter. In Port Solutions, sales increased by 10.6 percent.

At end-March, the regional breakdown, calculated on a rolling 12-month basis, was as follows: EMEA 52 (52), Americas 31 (32), and APAC 17 (15) percent.

The adjusted EBITA was EUR 33.8 million (33.4) and the adjusted EBITA margin 12.7 percent (11.7). The improve-

ment in the adjusted EBITA margin was mainly attributable to the cost-saving measures implemented in 2017, along with a more favorable sales mix and improved productivity. The operating profit was EUR 29.0 million (27.9) and the operating margin 10.9 percent (9.8).

The total number of equipment included in the maintenance agreement base increased 14.7 percent to 624,139 (544,292). Year-on-year, the annual value of the agreement base decreased 9.4 percent to EUR 233.4 million (257.5). On a comparable currency basis, the decrease was 2.2 percent. The decrease was primarily attributable to the harmonization of reporting practices following the MHPS acquisition. Sequentially, the annual value of the agreement base increased by 0.9 percent on a reported basis and 2.3 percent on a comparable currency basis.

## RISKS AND UNCERTAINTIES

Konecranes operates in the emerging countries that entail political, economic, and regulatory uncertainties. Adverse changes in the operating environment of these countries may result in currency losses, elevated delivery costs, or loss of assets. Konecranes operates a crane factory in Zaporozhye, Ukraine.

The operations in emerging countries have had a negative impact on the aging structure of accounts receivable and may increase credit losses or the need for higher provisions for doubtful accounts.

Konecranes has made several acquisitions and expanded organically into new countries. A failure to integrate the acquired businesses, MHPS in particular, or grow newly established operations may result in a decrease in profitability and impairment of goodwill and other assets.

One of the key strategic initiatives of Konecranes is oneKONECRANES. This initiative involves a major capital expenditure for the information systems. A higher-than-

expected development or implementation costs, or a failure to extract business benefits from the new processes and systems may lead to an impairment of assets or decrease in profitability.

Konecranes delivers projects, which involve the risks related, for example, to engineering and project execution including Konecranes' suppliers. A failure to plan or manage these projects may lead to higher-than-estimated costs or disputes with customers.

Challenges in financing, e.g. due to the currency fluctuations, may force customers to postpone projects or even cancel the existing orders. Konecranes intends to avoid incurring costs for major projects under construction in excess of advance payments. However, it is possible that the cost-related commitments in some projects temporarily exceed the amount of advance payments.

The Group's other risks are presented in the Annual Report.

### 1. CORPORATE INFORMATION

Konecranes Plc (“Konecranes Group” or “the Group”) is a Finnish public limited company organized under the laws of Finland and domiciled in Hyvinkää. The company is listed on the NASDAQ Helsinki.

Konecranes is a world-leading manufacturer and servicer of cranes, lifting equipment and machine tools, serving a broad range of customers, including manufacturing and process industries, shipyards, ports and terminals. Konecranes operates internationally, with its products being manufactured in North and South America, Europe, Africa, the Middle East, and Asia and sold worldwide. ### 2. BASIS OF PREPARATION

The unaudited interim condensed consolidated financial statements of Konecranes Plc for three months ending 31.03.2018 and 31.03.2017 have been prepared in accordance with International Accounting Standard 34 Interim Financial Reporting (“IAS 34”). As such, they do not include all the information and disclosures required in the annual financial statements, and should be read in conjunction with the Company’s annual consolidated financial statements as of December 31, 2017. The unaudited interim condensed consolidated financial statements including notes thereto are presented in millions of euros and all values are rounded to the nearest million (€ 000 000) except when otherwise indicated.

### 3. SIGNIFICANT ACCOUNTING JUDGEMENTS, ESTIMATES AND ASSUMPTIONS

The preparation of the financial statements in accordance with IFRS requires management to make estimates and judgments that affect the valuation of reported assets and liabilities and other information, such as contingent liabilities and recognition of income and expenses in the statement of income. These assumptions, estimates and judgments are

based on management’s historical experience, best knowledge about the events and other factors, such as expectations on future events, which are assessed to be reasonable in the given circumstances. Although these estimates and judgments are based on the management’s best understanding of current events and circumstances, actual results may differ from the estimates. Possible changes in estimates and assumptions are recognized in the financial reporting period the estimate or assumption is changed.

### 4. SIGNIFICANT ACCOUNTING POLICIES

The Company’s accounting policies adopted in the preparation of the unaudited interim condensed consolidated financial statements are consistent with those followed in the preparation of the consolidated financial statements for the year ended December 31, 2017. From January 1, 2018 onwards Konecranes applies also new and changed IFRS standards: IFRS15, IFRS9 and IFRS2 as described below.

Konecranes has adopted IFRS15, Revenue from contracts with customers, standard from January 1, 2018 onwards. The main differences to the previous revenue recognition method have arisen from:

- Right to return the goods in which company should not recognize revenue for sales for which the customer is expected to exercise its right to return the goods;
- Unusual warranty times or service type of warranties in which a portion of the transaction price needs to be allocated to the extended warranty time by using the estimated stand-alone price of the warranty and
- Volume discounts, where the most likely amount for volume discounts needs to be estimated and it should be periodized to each sales transaction to the customer which is entitled to the volume discount.

Konecranes applied the full retrospective approach in transition and thus the comparables for the periods in 2017 have been restated. The effects of implementing IFRS15 in 2017 reported numbers are reported in the following table. Changes to reported figures have effected to all reported segments.

Konecranes has adopted IFRS9, Financial Instruments, standard from January 1, 2018 onwards. On adoption, entities are required to apply the amendments without restating prior periods. IFRS9 introduces a single approach for the classification and measurement of financial assets according to their cash flow characteristics and the business model they are managed in, and provides a new impairment model based on expected credit losses. IFRS 9 also includes new regulations regarding the application of hedge accounting to better reflect an entity's risk management activities especially with regard to managing non-financial risks. The Group applies the simplified approach to record expected credit losses on its accounts receivable. The Group estimates credit losses in the future by using a provision matrix where accounts receivable are grouped based on different customer bases and different historical loss patterns. The effect of the transition to IFRS 9 is for the credit loss provision EUR +1.2 million, EUR

+0.4 million for the deferred tax assets and EUR -0.8 million for the the retained earnings at January 1, 2018.

Konecranes has adopted amendment to IFRS2 Classification and Measurement of Share-based Payment Transactions standard from January 1, 2018 onwards. On adoption, entities are required to apply the amendments without restating prior periods. The Group has performance share plans in which the share-based payment transaction with net settlement have features for withholding tax obligations. According to IFRS 2 amendment, the existing plans at 1.1.2018 are not divided anymore into two components (cash-settled and equity-settled) but are classified in their entirety as equity-settled share-based payment transactions. The effect of IFRS 2 amendment to the equity is EUR +1.5 million, to non-interest bearing liabilities EUR -5.3 million and to deferred assets EUR -3.8 million at January 1, 2018.

### Guarantees

The guarantees are related to the fact that from time to time Konecranes provides customers with guarantees that guarantee the Company's obligations pursuant to the applicable customer contract. In sale of investment goods (machinery) the typical guarantees are the following:

- tender guarantees (bid bonds) given to the customer to secure the bidding process
- advance payment guarantees given to the customer to secure their down payment for project
- performance guarantees to secure customers over the Company's own performance in customer contracts, and
- warranty period guarantees to secure the correction of defects during the warranty period.

### Contingent liabilities relating to litigation

Various legal actions, claims and other proceedings are pending against the Group in various countries. These actions, claims and other proceedings are typical for this industry and consistent with a global business offering that encompasses a wide range of products and services. These matters involve contractual disputes, warranty claims, product liability (including design defects, manufacturing defects, failure to warn and asbestos legacy), employment, vehicles and other matters involving claims of general liability.

While the final outcome of these matters cannot be predicted with certainty, Konecranes is of the opinion, based on the information available to date and considering the grounds presented for such claims, the available insurance coverage and the reserves made, that the outcome of such actions, claims and other proceedings, if unfavorable, would not have a material, adverse impact on the financial condition of the Group.

Derivatives are initially recorded in the balance sheet at fair value and subsequently measured at fair value at each balance sheet date. All derivatives are carried as assets when fair value is positive and liabilities when fair value is negative. Derivative instruments that are not designated as hedges (hedge accounting) are measured at fair value, and the change in fair value is recognized in the consolidated statement of income. When the derivative is designated as a hedge (hedge accounting) the effective part of the change in fair value is recognized in other comprehensive income. Any ineffective part is recognized in the consolidated statement of income. The foreign exchange forward contracts are measured based on the closing date's observable spot exchange rates and the quoted yield curves of the respective currencies. Interest rate swaps are measured based on present value of the cash flows, which are discounted based on the quoted yield curves.

The management assessed that cash and short-term deposits, accounts receivable, accounts payable, bank overdrafts and other current payables approximate their carrying amounts largely due to the short-term maturities of these instruments.

The fair value of the financial assets and liabilities is included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. Long-term fixed-rate and variable-rate borrowings are evaluated by the Group based on parameters such as interest rates and the risk characteristics of the loan.

### Derivatives not designated as hedging instruments

The Group enters into other foreign exchange and electricity forward contracts or currency options with the intention of reducing the risk of expected sales and purchases, these other contracts are not designated in hedge relationships and are measured at fair value through profit or loss.

# Notes

## CASH FLOW HEDGES

### Foreign currency risk

Foreign exchange forward and option contracts measured at fair value through OCI are designated as hedging instruments in cash flow hedges of forecast sales and purchases in US dollar. These forecast transactions are highly probable, and they comprise about 44.7% of the Group's total hedged transaction flows. The foreign exchange forward contract balances vary with the level of expected foreign currency sales and purchases and changes in foreign exchange forward rates.

At the inception of these deals the Group assess whether the critical terms of the foreign currency forward contracts match the terms of the expected highly probable forecast transactions. On a quarterly basis the Group performs qualitative effectiveness test by checking that the hedging instrument is linked on the relevant assets and liabilities, projected business transactions or binding contracts according to the hedging strategy and that there are no related credit risks. Hedge ineffectiveness is recognized through profit or loss.

The cash flow hedges of the expected future sales and purchases in 2018 and 2017 were assessed to be highly effective and a net unrealized loss, with a deferred tax asset relating to the hedging instruments, is included in OCI. The amounts recognized in OCI are shown in the table below and the reclassifications to profit or loss during the year are as shown in the consolidated statement of income.
